# AutoScheduler Is Your WMS Accelerator
Intelligent Warehouse Orchestration

AutoScheduler is a WMS accelerator that sits on top of WMS and ERP systems to build inventory and capacity-constrained schedules that help solve problems like:

- Poor OTIF

- Dock schedule conflicts

- Inventory shortages

- Inefficient workforce allocation

- Struggling to meet carrier appointment times

"Although the WMS market is mature, we foresee the need for continued innovation in areas such as user experience, adaptability, decision support, materials handling automation integration, and work planning and optimization."
