

AutoScheduler for 3PLs

Automating Labor, Prioritization & Flow

3PLs live and die based on how well they manage labor, automation, and flow across facilities. Perfecting labor and work management means higher margins and stronger customer retention. AutoScheduler adds a **real-time decision layer** on top of WMS/ERP systems, giving operations leaders the foresight to act—not react.

Customer Testimonial – Operations Manager at a 3PL Site

“Now I just log in, and the dashboard shows me what needs attention. I can immediately identify loads that might go late, call it out, and have my supervisors fix it before it becomes an issue. Before AutoScheduler, I had to dig through our WMS shipment by shipment, which took minutes each—and hours in total.”

Before AutoScheduler: Manual checks in WMS, 3–5 minutes per order, constant firefighting.

After AutoScheduler: A single dashboard highlights exceptions, enabling proactive communication and faster resolution.

Why 3PLs Choose AutoScheduler: Proven Results

- **6–10% worker productivity improvements** achieved with 3PL customers
- Time spent assigning shifts cut from **30–90 minutes** down to just a few clicks.
- Managers empowered to look **12–18 hours ahead** in workload planning.

Key Capabilities

Exception Management

Instant visibility into late or at-risk loads.

Shift Optimization

Auto-assigns work by shift—no more manual balancing.

Real-Time Planning

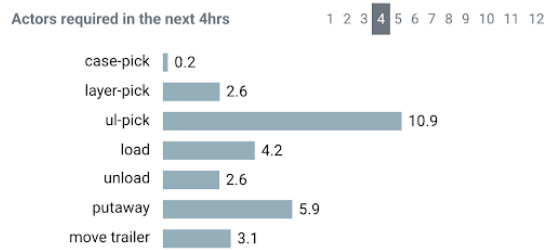

Predictive insights for labor and work standards.

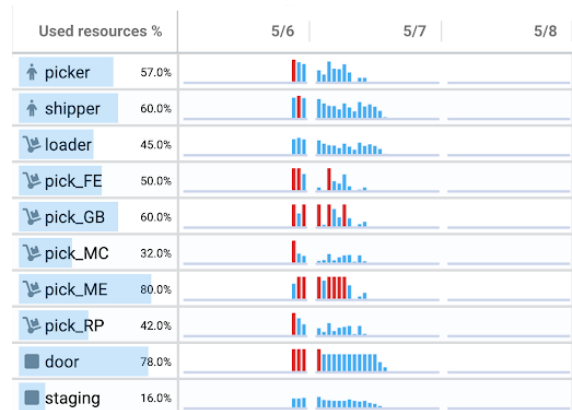

Reporting

Fast access to inbound/outbound volumes and shift readiness.

Dynamic Worker Assignments

Real Time & Predictive Resource Utilization

Who we are

AutoScheduler is a **Decision Agent** that sits on top of your WMS to optimize labor, inventory, automation, and dock schedules in real time.

We continuously harmonize data across disparate systems and intelligently sequence tasks across your entire operation, adapting in real time as conditions change.

You're already introducing physical automation. Now It's time to automate decisions to improve service, increase throughput, and lower operating costs.

Want to see how leading 3PLs are increasing throughput and retention with AutoScheduler?
